

June 2024

As Cartell moves forward with our wireless product line, our tradition of hard-wired circuit boards and sounders is coming to an end.

Over the next several months, production of our Legacy products will cease. This affects the following items:

CT-2B (Driveguard and Driveguard Integrator)	<b>Replacement CW-HUB</b>
CT-2BG (Pioneer Free Exit)	<b>Replacement CW-SYS</b>
CT-3B (Replacement Board)	
CT-3BG (Replacement Board)	
AA-1 (Indoor Sounder)	<b>Replacement CW-SOU</b>
CT-A1 (Indoor Sounder)	<b>Replacement CW-SOU</b>
CT-11 (Outdoor Sounder)	

Our new products slated for 2025 include our wireless HUB (CW-HUB) which mates with the wireless sensor (CW-SEN and CT-6 wired probe. Along with the new Cartell mobile application (available on Android and Apple platforms), the CW-HUB will provide notifications on your smart phone and tablets. We look forward to providing quality service and products for years to come.

Though production will end, technical support will not terminate. Contact us at 717-532-0033 option 1 for technical support. Please note that the CT-6 wired probe remains in production. The CF-2C is slated to be available through 2026 at which point it will end production.
